

IP - Licensing 2026

ORIGINAL PROGRAM DATE

September 2, 2026

AVAILABLE MEDIA TYPES

Video & Audio MP3

*Presented in partnership with the WSBA
Intellectual Property Section*

REPORTING YOUR CREDIT

This on-demand program was a live seminar presented on September 2, 2026. If you attended or viewed the original presentation, please note that WSBA members may not claim credit for the same CLE sessions if repeated within their three-year reporting period.

DESCRIPTION

Join us on-demand for the 2026 IP-Licensing CLE program. Understand the lifecycle of an IP license: from proposal, to patent, to payout. Gain tips and best practices for avoiding pitfalls as well as key components to look for when drafting licensing agreements.

AGENDA

1 From Proposal to Patent: What Happens Before the License Gets Signed?

This session examines the upstream elements involved in intellectual property licensing, including sponsored research terms, unusual encumbrances, patent management considerations, and nontraditional licensing paths within early research agreements. Participants will come away with practical tools and guidance they can apply in negotiations for licenses and other research agreements.

Meredith Reynolds – CoMotion at the University of Washington, Seattle, WA

Venu Sareen – CoMotion at the University of Washington, Seattle, WA

2 From Patents to Payouts: Licensing and Deal Economics in Life Sciences Transactions

This session takes patent, IP, and transactional practitioners from the fundamentals of life sciences licensing through the deal economics and financing structures that increasingly determine how value is captured. Drawing on language from real collaboration and license agreements, the session walks through the recurring drafting and negotiation issues that most often cause disputes. We then turn to how the money is actually structured. It also touches briefly on royalty financing—a growing way for companies to raise cash by selling rights to a drug's future royalties instead of issuing stock—and what that means for the licenses counsel negotiate today.

Mai Zymaris – Ice Miller LLP, New York City, New York

3 Bayh-Dole Licensing in 2026: March-in Risk, Compliance, and Drafting Considerations

The presentation will discuss various requirements the Bayh-Dole Act imposes on the licensing of federally funded inventions. It will also discuss the rights the government has in federally funded inventions.

Kerry Lee Andken – Dorsey & Whitney LLP, Seattle, WA

(agenda continued from previous page)

4 **From Copilots to Autonomous Agents: Licensing Challenges Created by Agentic AI**

As AI evolves from traditional software to generative AI and increasingly autonomous agentic AI, contracts must address new challenges created by systems that can generate content, make decisions, and take actions with limited human involvement. This CLE examines the key differences among these technologies and explores emerging contractual approaches to oversight, accountability, liability, and risk allocation for agentic AI tools and solutions.

Tanya Huertas-Langevin – Stoel Rives, LLP, Portland, OR

5 **Licensing Data in the Age of AI: Key Contractual Considerations**

Data has long been a core business asset, and its value has only grown as organizations increasingly use it to drive innovation, analytics, and artificial intelligence initiatives. This session examines the legal and practical issues that arise when licensing data. The presenters will discuss common contractual provisions, emerging issues involving AI and derived data, and practical considerations for structuring data licensing arrangements.

Kenny Gutierrez – Stoel Rives, LLP, San Francisco, CA

John Pavolotsky – Stoel Rives, LLP, San Francisco, CA
